

STRATEGIC ENTERPRISE CONSULTING Authentication Services

Blue Spruce Technologies, PO Box 189 Greenland, NH 03840
603-766-6100

Blue Spruce Technologies is a security systems integrator focused on solving the unique challenges facing Enterprise IT companies including secure messaging, secure network access, and the integration of complimentary security technologies. The Company provides consulting and services ranging from market research to strategy & planning through system implementation.

Blue Spruce empowers you to understand and utilize the many authentication mechanisms that are available. We take a comprehensive approach that includes selection and implementation of 802.1X, RADIUS, Directory and Public Key Infrastructure (PKI) systems tailored to your network environment. We'll help you determine the most appropriate method of implementing 802.1X, including selection of an Extensible Authentication Protocol (EAP) type to best meet the requirements of both your wired and wireless users, and assistance with properly configuring your client PCs, the network infrastructure, and the back end systems to support the selected method.

Highlights of the Blue Spruce Technologies authentication solutions include:

- ▲ Decision services for Authentication, Authorization and Accounting (AAA) systems including:
 - ~ End station recommendations regarding which 802.1X client to use
 - ~ EAP Type recommendations and selection
 - ~ Radius recommendations and selection
 - ~ Directory Integration
 - ~ Establishing a System-level approach
 - ~ Future capabilities with EAP signaling
- ▲ Reduced time to implement 802.1X, encryption, and RADIUS
- ▲ Mapping of user credentials to business role
- ▲ Strategy for deployment of certificate services, tokens and bio-metrics
- ▲ Installation, implementation, tuning and training

Blue Spruce technologies aims to provide knowledge and assistance in areas of IT where the business demands are driving new ways of looking at the challenges of becoming and remaining an industry leader. Our approach to realizing business value
